

A large variety of LED and electromagnetic football display boards are available. The football display boards can be used in small gymnasiums or large football stadiums. ALGE-TIMING offers display boards with figures heights of 30, 45, 60, 100 and 150 cm.

The red LED can be perfectly seen at all conditions. The brightness is adjusted to the surrounding light, i.e. with direct sunlight the LED are bright and at night the brightness is reduced.

The electromagnetic display boards always dispose of a good contrast and can be well seen at any weather. At night an illumination is required (e.g. floodlight).

The display board is controlled by a console that is connected either by cable or radio (optional).

Display Boards

with LED Digits

A large number of LED models are available. According to budget and requirements everybody finds the perfect model.

Football Display Boards D-LINE:

The models of this display board are available with figures heights of 300, 450, 600, 1000 and 1500 mm. In the following model description XXX stands for the variable figure height.

D-LINEXXX-O-4-E2

Time: 2 digits in minutes
Score: each team from 0 to 9

D-LINEXXX-O-2+2x19-E1

Time: 2 digits in minutes
Score: each team from 0 to 19

D-LINEXXX-O-6-E2-T

Time: 4 digits in minutes and seconds
Score: each team from 0 to 9

D-LINEXXX-O-4+2x19-E1

Time: 4 digits in minutes and seconds
Score: each team from 0 to 19

D-LINEXXX-O-8A-E2

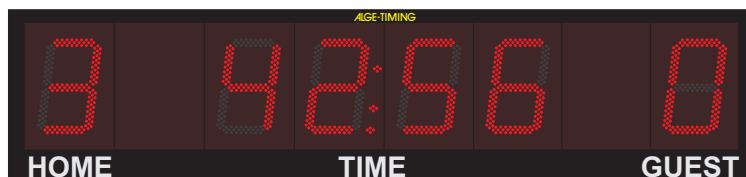

Time: 6 digits in minutes, seconds and 1/100, also applicable for track and field athletics
Score: each team from 0 to 9

D-LINEXXX-O-6+2x19-E1

Time: 6 digits in minutes, seconds and 1/100, also applicable for track and field athletics
Score: each team from 0 to 19

Example: D-LINE450-O-2+2x19-E1

Example: D-LINE450-O-6-E2-T

Control for LED display boards:

All display boards include a control D-CKN. Because of the integrated display the display board can also be operated without sight contact.

- D-CKN:** Standard control - with cable connection
- D-CKN-A:** Alternative with surcharge - integrated accu for mains independent operation
- D-CKN-TX:** Alternative with surcharge - integrated radio for wireless data transmission
- D-CKN-TXA:** Alternative with surcharge - integrated accu and radio so that the user can move around freely

Radio control for LED display boards:

In case the display board should be controlled by radio, a control D-CKN-TX or D-CKN-TXA is required and for the display board the radio receiver D-RX.

Attention: radio controlled display board do also need a power supply!

Extension for the LED football display board:

- Temperature sensor (TS):** Time and temperature are shown if the match clock is not used
- Light sensor (LS):** The brightness is adjusted automatically to the surrounding brightness.
- Radio day time (DCF):** The time is always to the split second, changes automatically between summer and winter time

Models with text display:

It is possible to extend the LED football display board with a matrix display. Depending on size of the matrix display board D-RTNM the club name or advertisements can be shown.
